Elog - Feature #11469

Warn user before navigating away after text is entered into entry

01/22/2016 02:22 AM - Michael Wren

Target version:	Version 1.0		**Spent time:**	0.00 hour

Description

Many times I've mis-clicked and lost a long entry. It'd be nice if the page warned me before I leave after I've added text to the add entry dialog, or attached files, or interacted with add entry at all other than just bringing it up.

Very basic example of how this can be accomplished in JavaScript:
http://jsfiddle.net/AlienWebguy/4fNCh/

A confirmation after clicking the close button (or hitting the escape key) in the same cases would also be very helpful.

History

#1 - 11/23/2016 11:09 PM - Kyle Hazelwood

- Category set to Client

- Status changed from New to Closed

- Priority changed from Normal to Low

- Target version set to Version 1.0

#2 - 08/05/2018 02:38 PM - Michael Wren

This is still an issue in Elog v2.0.
